

Advanced Java MCQ

1. Suppose you want to know each time a request comes in, so that you can log it. Which listener is appropriate?

- A. ServletContextAttributeListener
- B. ServletContextListener
- C. HttpSessionListener
- D. **ServletRequestListener**

☐ Answer: D

2. Which of the following is true for Postman?

- A. **Postman is used to test web services**
- B. Postman is used to test database queries
- C. Postman is used to test CSS and HTML
- D. None of the above

☐ Answer: A

3. Which class defines the `getWriter()` method?

- A. HttpServletRequest
- B. **HttpServletResponse**
- C. ServletConfig
- D. ServletContext

☐ Answer: B

4. `org.hibernate.SessionFactory` allows retrieving contextual sessions using:

- A. getSession()
- B. getCurrent()
- C. **getCurrentSession()**
- D. None of the above

☐ Answer: C

5. Preferred way to read model attribute `y` in JSP?

- A. **Custom tags / EL (`${y}`)**
- B. Scriptlets
- C. Directives
- D. Actions

☐ Answer: A

6. Which is correct about RESTful messaging?

- A. Client sends HTTP Request, server sends HTTP Response
- B. Messages contain data and metadata
- C. **Both A and B**
- D. None

☐ Answer: C

7. `getAttribute()` and `setAttribute()` are defined in:

- A. HttpSession
- B. ServletRequest
- C. ServletContext
- D. **All of the above**

☐ Answer: D

8. Which method is used to instantiate a bean?

- A. **Static factory method**
- B. Default-init method

- C. Destroy method
- D. Lazy-init method

☐ **Answer: A**

9. Which Hibernate method saves or updates an entity?

- A. session.update()
- B. session.keep()
- C. **session.saveOrUpdate()**
- D. session.load()

☐ **Answer: C**

10. JDBC driver that converts JDBC calls directly into vendor-specific protocol?

- A. **Native-API driver**
- B. Network Protocol driver
- C. Thin driver
- D. None

☐ **Answer: A**

11. One-to-one relationship in Hibernate is represented by:

- A. many-to-one
- B. many-one
- C. ManyToOne
- D. **None of the above**

☐ **Answer: D**

(Uses @OneToOne)

12. What is @Controller annotation?

- A. **Marks a class as Spring MVC Controller**
- B. Controls transaction management
- C. Controls dependency injection
- D. Controls AOP

☐ **Answer: A**

13. Database table mapping is stored in:

- A. .dbm
- B. **.hbm**
- C. .ora
- D. .sql

☐ **Answer: B**

14. ORM tools simplify:

- A. Data creation
- B. Data manipulation
- C. Data access
- D. **All of the above**

☐ **Answer: D**

15. Element used to specify access attributes for bean methods:

- A. security:spring
- B. **security:intercept-methods**
- C. security:intercept
- D. security:protect

☐ **Answer: B**

16. Isolation levels supported by Spring:

- A. DEFAULT
- B. READ COMMITTED
- C. READ UNCOMMITTED
- D. **All of the above**

☐ **Answer: D**

17. Default scope of Spring beans:

- A. Prototype
- B. Session
- C. Request
- D. **Singleton**

☐ **Answer: D**

18. Objects created by Spring in given code?

- A. UserService
- B. UserController
- C. **Both UserController and UserService**
- D. None

☐ **Answer: C**

19. <mapping class="?" /> contains:

- A. DAO class name
- B. **Entity class name**
- C. Config file
- D. None

☐ **Answer: B**

20. Which is NOT Dependency Injection?

- A. Setter-based DI
- B. Autowiring DI
- C. Both
- D. **None of the above**

☐ **Answer: D**

21. Which is a stereotype annotation?

- A. @Autowired
- B. **@Controller**
- C. @PreDestroy
- D. @Qualifier

☐ **Answer: B**

22. Dirty checking in Hibernate means:

- A. **Automatic detection of entity changes**
- B. Remove dirty data
- C. Validate insert
- D. None

☐ **Answer: A**

23. doGet () and doPost () return:

- A. int
- B. **void**
- C. String
- D. None

☐ **Answer: B**

24. Shutdown of IoC container is handled by:

- A. shutdownHook()
- B. shutdownHandler()
- C. registerHook()
- D. **registerShutdownHook()**

☐ **Answer: D**

25. Object used to forward request:

- A. ServletContext
- B. **ServletConfig**

C. **RequestDispatcher**
D. ResponseDispatcher
☐ **Answer: C**

26. Logging in Hibernate is supported by:
A. log4j.xml
B. log4j.properties
C. **Both A and B**
D. None
☐ **Answer: C**

27. Bean in Spring is:
A. Component
B. **Object**
C. Class
D. Container
☐ **Answer: B**

28. Which is NOT a JSP scope?
A. session
B. request
C. **response**
D. page
☐ **Answer: C**

29. Interface used to execute SQL queries:
A. Connection
B. **Statement**
C. ResultSet
D. None
☐ **Answer: B**

30. Which is NOT a Hibernate object state?
A. **Attached**
B. Detached
C. Persistent
D. Transient
☐ **Answer: A**

31. Which is NOT true about Servlet?
A. Persistent
B. Platform independent
C. Multi-threaded
D. **Single-threaded**
☐ **Answer: D**

32. Which is NOT a mode of autowiring?
A. By name
B. By constructor
C. No autowiring
D. **Constructor then byType fallback**
☐ **Answer: D**

33. @GetMapping and @PostMapping are used on:
A. **Methods**
B. Class
C. Variables
D. None
☐ **Answer: A**

34. Tags of hibernate.cfg.xml:

- A. SQL dialect
- B. DTD
- C. JDBC connection
- D. **All of the above**

☐ **Answer: D**

35. To handle 404 error in JEE, configure:

- A. http.xml
- B. 404.xml
- C. **web.xml**
- D. None

☐ **Answer: C**

36. Maven command-line tool:

- A. maven
- B. build
- C. **mvn**
- D. none

☐ **Answer: C**

37. SessionFactory holds:

- A. Session
- B. ConnectionProvider
- C. Transaction
- D. **Second-level cache**

☐ **Answer: D**

38. Maven test, compile, verify are:

- A. **Phases**
- B. Goals
- C. Lifecycle
- D. None

☐ **Answer: A**

39. Spring transaction abstraction:

- A. TransactionManager
- B. **PlatformTransactionManager**
- C. PlatformManager
- D. PlatformTransaction

☐ **Answer: B**

40. Function in CommandLineRunner:

- A. **run()**
- B. runner()
- C. runTask()
- D. None

☐ **Answer: A**

41. Valid JSP scopes:

- A. request, page, context, application
- B. response, page, session, application
- C. request, page, session, global
- D. **request, page, session, application**

☐ **Answer: D**

TOPICS TO LEARN (ROADMAP)

1 Core Java

- OOP concepts
- Interfaces & Exceptions

- Collections
 - JDBC basics
-

2 Servlets & JSP

- Servlet lifecycle
 - Request & Response
 - Listeners & Filters
 - JSP scopes
 - EL & JSTL
 - RequestDispatcher
-

3 Web Services & REST

- HTTP methods
 - REST principles
 - JSON
 - Postman usage
-

4 Hibernate / JPA

- ORM basics
 - Entity states
 - Annotations
 - Relationships
 - Session & SessionFactory
 - Dirty checking
-

5 Spring Core

- IoC & DI
 - Bean lifecycle
 - Bean scopes
 - Autowiring
 - XML vs Annotation config
-

6 Spring MVC

- @Controller
 - @RequestMapping
 - ModelAndView
 - JSP integration
-

7 Spring Boot

- @SpringBootApplication
 - Embedded Tomcat
 - REST controllers
 - CommandLineRunner
-

8 Maven

- pom.xml
 - Lifecycle & phases
 - Goals
 - settings.xml
-
